"reasoning": "We need to output Selenium Java code to extract the given DOM elements, but instructions: \"Do not use ID if the value has number in it.\" So we should locate elements using other attributes (e.g., name, class, etc.) for those with IDs containing numbers. The IDs: createLeadForm_companyName (no number), createLeadForm_lastName (no number), createLeadForm_firstName (no number), ext-gen630 (has number). So for first three we can use ID (since no number). For the submit button, we cannot use ID because it has number. Use maybe By.cssSelector(\"input[type='submit'][value='Create Lead']\") or By.xpath based on value or class.\n\nWe need to \"Extract the below given DOM\" meaning probably find elements and maybe get their values? Provide code that locates them. Provide only Java code, no explanations.\n\nThus produce a snippet:\n\nWebDriver driver = new ChromeDriver();\ndriver.get(\"...\"); // placeholder\n\nWebElement companyName = driver.findElement(By.id(\"createLeadForm_companyName\"));\nWebElement lastName = driver.findElement(By.id(\"createLeadForm_lastName\"));\nWebElement firstName = driver.findElement(By.id(\"createLeadForm_firstName\"));\nWebElement createLeadBtn = driver.findElement(By.xpath(\"//input[@type='submit' and @value='Create Lead']\"));\n\nMaybe also show actions: sendKeys etc.\n\nBut just extraction: maybe get text? For input fields, getAttribute(\"value\").\n\nWe'll output code accordingly.\n\nMake sure no explanations. Provide only Java code."
